**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 20 February 2002.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 2,4-8,10,12-16,18, and 19 are allowed over the prior art of record.
2. The following is a statement of reasons for the indication of allowable subject matter:  
  
Please see listed reasons for allowance in Paper #7.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 1,3,9,11, and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Kagoshima et al (5890118).

As per claim 1,9, and 17, Kagoshima et al (5890118) teaches a speech synthesis apparatus/program code using pitch marks comprising (col. 3 lines 22-42) first calculation means

Art Unit: 2655

for calculating a distance between first two pitch marks of a voice portion of speech data to be processed (col. 6 lines 61-67) and second calculation means for calculating a difference between adjacent inter pitch mark distances (col. 7 lines 1-13) and management means for storing the calculation results obtained by said first and second calculation means in a file and managing the results (as storing the adjusted waveforms that contain the pitch information -- col. 11 line 65 to col. 12 line 9)

As per claims 3 and 11, Kagoshima et al (5890118) teaches storage of the pitch marks (m0- mk) with the waveform trains.

### ***Response to Arguments***

5. Applicant's arguments filed 2/20/2002 have been fully considered but they are not persuasive.

3. Applicant's argue that the Kagoshima reference teaches interpolation of pitch periods and does not teach calculating a distance between two pitch marks. Examiner disagrees and points to the referenced portions of Kagoshima above, furthermore, examiner points to figure 4 which explicitly shows pitch marks m0-m5. Furthermore, the arguments that Kagoshima fails to specify how to calculate the distance between pitch marks, it is noted that the features upon which applicant relies (i.e., how the calculation is performed) are not recited in the rejected claim(s). Applicant is comparing/contrasting the "how" of the calculation, wherein the scope of the claim language states "calculating" (and in fact, the "how" of the calculation, specified in the previously allowed claims, is the reason why these claims have been determined to be allowable)

Art Unit: 2655

Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

### ***Conclusion***

4. This is an RCE of the instant application. All claims are drawn to the same invention claimed in the earlier response and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
